### **RESTRICTION**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 52-90, drawn to a hollow preform, a container, and a method of making, filling and closing a container.

Group II, claims 91-94, drawn to a method for making a sealed container and a sealed container.

Group III, claims 95-99, drawn to a method of punch forming a pull tab.

Group IV, claims 100-102, drawn to a foil disc.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I has the special technical feature: a hollow perform, container and method of making, filling and closing the container including the body having an open end, an axially outermost extremity of the open end, and a shoulder having a radially innermost diameter less than the internal diameter of the outermost extremity.

Group II has the special technical feature: a method for making a sealed container and container including a removable closure so that an annular portion of the closure cooperates with an annular portion of the body to provide a frustum seal therebetween.

Group III has the special technical feature: a method of punch forming a pull tab made from a laminate including a space between the tab and a main body.

Group IV has the special technical feature: a foil disc and a pull tab with a space therebetween

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen F. Gerrity whose telephone number is 571-272-4460. The examiner can normally be reached on Monday - Friday from 5:30 - 2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
